Education

UTFPR (Federal University of Technology – Paraná)

Curitiba, Brazil

M.Sc. in Computer Science and Electrical Engineering — *Mar. 2025 - Present*

- Advisor: Thiago A. R. Passarin
- Research topics: Ultrasonic imaging, Beamforming, Acoustic lens, Non-destructive Testing (NDT)

UP (University of Porto)

Porto, Portugal

Undergraduate Exchange Student — *Aug. 2023 - Feb. 2024*

- Completed classes: Audio Signal Processing, Machine Learning, Forecasting.

UTFPR (Federal University of Technology – Paraná)

Curitiba, Brazil

B.Sc. in Electrical Engineering *(Summa Cum Laude)* — *Mar. 2019 - Mar. 2025*

- Thesis title: Development of a Visual Odometry Method for Ultrasonic Immersion Inspection
- Class ranking: Top 0.1% among all Electrical Engineering students

Research Experience

LASSIP - Laboratory of Statistical Signal Processing & Inverse Problems

Curitiba, Brazil

Graduate Research Assistant — *Mar. 2025 - Present*

- ***Advisor: Thiago A. R. Passarin***
- Developed a Python-based ray-tracing Spatial Impulse Response (SIR) ultrasound simulator to support and optimize acoustic lens design.
- Designed and implemented a machine learning–based anomaly detection framework using PyOD for flaw detection in ultrasonic non-destructive testing of pipes.
- Designed an acoustic lens capable of statically inspecting large pipe sections (e.g., 90°), significantly reducing inspection time in subsea inspections. The technology was applied and is currently being patented by Petrobras.

LASSIP - Laboratory of Statistical Signal Processing & Inverse Problems

Curitiba, Brazil

Undergraduate Researcher — *Apr. 2021 - Aug. 2023*

- ***Advisor: Thiago A. R. Passarin***
- Developed an image-processing-based system for underwater 2-D position estimation using a Raspberry Pi.
- Formulated and solved an optimization problem to compensate for ultrasound image distortions caused by temperature gradients in weld bead inspections.
- Implemented a parametric model to estimate acoustic refraction profiles between heterogeneous media using ultrasonic data.
- Implemented and evaluated multiple ultrasonic image reconstruction algorithms for non-destructive testing applications.

Laboratory of Electronic Control of Electrical Machines

Curitiba, Brazil

Undergraduate Researcher — *Apr. 2019 - Mar. 2021*

- ***Advisor: Walter D. Sanchez***
- Implemented numerical methods in MATLAB for electrical engineering applications, including power flow analysis and electrical machine modeling.
- Programmed, deployed, and tested electrical machine controllers (e.g., soft starters and PLCs) for industrial applications using WEG equipment.

Research Output

Peer-review publications

Publications in preparation

Fellowships & Prizes

2025	**3rd Best Thesis**, Awarded by the Regional Council of Engineering (CREA-PR) for prominent electrical engineering thesis.	*Paraná, Brazil*
2025	**Best in Class Honor**, Recognized as the top-performing student in the 2019 class of B.Sc. in Electrical Engineering.	*Paraná, Brazil*
2025	**Petrobras Graduate R&D Fellowship**, Awarded by the Brazilian Petroleum Company (Petrobras) to support graduate research assistants at the R&D project AUSPEX.	*Paraná, Brazil*
2024	**Ranked 1st**, Scholarship selection for a full tuition waiver for exchange period	*Paraná, Brazil*
2023	**PRH-ANP Undergraduate Fellowship**, Awarded by the Brazilian National Agency of Petroleum, Natural Gas and Biofuels (ANP) to students with high academic performance and research potential in the energy sector	*Brazil*
2021	**Petrobras Undergraduate R&D Fellowship**, Awarded by the Brazilian Petroleum Company (Petrobras) to support undergraduate researchers at the R&D project AUSPEX	*Paraná, Brazil*

Skills

Programming & Computing	Python, MATLAB, C/C++, CUDA, NumPy, SciPy, Matplotlib, PyTorch
Tools & Platforms	Git, GitHub, Linux, LaTeX, AutoCAD, SolidWorks
Aditional Skills	Academic writing, Public speaking, 3D modelling and printing
Languages	Portuguese (Native), English (professional proficiency/C1), Spanish (B2)
